LESULTS AT FUGET SOUND.

its natural effects upon the industries of that re-gion. (oal and lumber are the great interests these. The coal muse are closed and the lumber business is in an unsatisfactory condition.

All Chinese workers have been expelled from
that region, and this, with the disturbances that
led to it and attended it, has been a heavy blow
to the activities of the country. Though the Chinese were the direct object of attack, their presence was only a pretext or excuse. The cantes of the distortances lie deeper. They are mainly in the men themselves. Vile demagogues and pretentions eciolists have filled oir minds with utteriv fordish and unrealizable things. As a consequence they have become idled our easonable and victors; and they assaired the Chinese not because the 'binese were really in their way, but because they could be moved. in this direction by the so unitrels of demagogy more easily than is any other.

The tregen Improvement company has closed them. The force only—the place manufacture owned by a San Francis to company, is suit purting out a little coal; but the great industry of the east side of Puget Sourd is practically sus pended. When it cat start up again no one can tell. Its inspension has cut off wages and dis-borsements in and around Seatze to the an oat of \$40,000 per month—a staggering blow to the industry and business of the country. It is the direct, natural and foreseen consequence of an stances attending it, it has caused more com-

ment than any other.

Owners of the mines have not been able to go the matter of management. Now Chinese were employed in the mines, but a considerable number were employed on the outside, picking slate from the coal and leading cars. These were driven away by the so-called labor organization of the roal region, and then wages were demanded for the work which could not be paid without loss. Again, there was an attempt to sive. Finally the m us owners agreed to pay three dollars a day to the coal cutters, and as the mines were well opened and in good condition it was found by the men that the output was greater than they had expected; where upon they refused to work for three dollars a dny, and demanded terms that were wholly in-It was loss of money to go on, and

The only market for this coul is at San Fran-The only market for his coal is at San Francisch, and there, it must sell in competition with coal from all parts of the world. Ships coming for grain carry coa, of the best quality from Australia and England for less money than any coal has ever bean shipped for from Puget could, even by sail. Only is taken in grain ships in lieu of other ballest at nominal rates; for there is a grain to the bill. If fraight was set. for there is a gain to the ship if freight money for there is a gain to the ship if freight money enough is made mere, to pay the cost of unloading the coal at San Francisco. As a consequence cargoes of their bituminous coal have been bought recently as San Francisco, as low as \$6 20 per ton. It is against this competition that the poorer coal of Puget evand must be sold, in a-market where the demund is limited It is easy to see from this how close a calcula-

outh.
Of course a bady of ignorant, turbulent and
infrasoning men, infranci by rawals who call
themselves the champions of labor, cannot understand these conditions, or will not under-stand them. They have been told that they could force the mine-owners to yield to their terms, and they have persisted in the attention In spite of all remnostrance. The mines have not been closed in any spirit of retaliation, but solely because, as a business proposition, it will not pay to work them under the terms which In an industrial point of view, expulsion of

the Chinese has made matters worse for every interest of the Pager sound country. These was no sense whatever in the crusade upon the Chinese, since they were a help to the undustry of the country instead of a drawback to it; and now, since they are gone, this is already demon-strated. Moreover, their departure has not tended in the least degree to settle the condi-tions out of which the disturbances proceeded. The spirit of fideness and loaferism, of improvidence, vice and discipation, that lies behind the whole consist, has not only not been removed or cured, but, on the contrary, has grown by what it has been feeding on. The outburst of fury against the Chinese was an effort of the first and ussain a planted and mistirected. normed and passion, inflamed and misdrected by demagogues who find distinction in that kind of wors, and who play on the creduity and beser instincts of their dupes for profit to themselves. Wherever such a body of men is found, there the rascals and scoundrels of "azitation" will be, to spout into their ears the false de-trines, miserable piritudes, and half-troths more pernicious than hald falseboods, embaded in the catch phrases of so-called socialistic philesother. The coal cultint of Pure sound has practiced's crased, hop culture is at an ent, the breiness of canning ash cannot go on, the work

lest all fact result would be to paralyze in early. The next result with the leading of wages paid for white labor in marry the whole has of endployments. It is easy to see with. Hitheritable Hither has been performing part of the work of the choracy a lower wages than bays. the Uthrese have been performing part of the work of the chontry a lower wages than bave are feel with the lock of the temperance leading temperature leading the producers are one of the increased the laboring dasses, which no one after pla to dispute, or the real green may one of the increase of the laboring dasses, which is one at the laboring dasses, which is one at the increase of the indirect of the second laboring dasses, which is one at the indirect of the second laboring dasses, which is one at the indirect of the indirect of the second laboring dasses, which is one at the indirect of the second laboring dasses, which is one at the indirect of the second laboring dasses, which is one at the laboring dasses, and is one at the laboring dasses, which is one at the laboring dasses, and is one at the laboring dasses, which is one at the laboring dasses, which is one at the laboring dasses, and is one at the laboring dasses, which is one at the laboring dasses, which is one at the laboring dasses, and is one at the laboring dasses, which is one at the laboring dasses, and is one at the laboring dasses, which is one at the laboring dasses, and is one and must illustrate bette to field the hone market to some check of even to each of seeking selection of each to select selection and selection for the market cannot be turned out within selection. for the market cannot be torned and within each for the market cannot be torned and the minutes of them must stope them goeds make for the market only a tives amount on the expended for later. Hence, as the "binese taxes been doing certain parts of the work of production at tweet wayes them white persons domand, it is been possible to pay higher wages to white persons domand, it is been possible to pay higher wages to white persons domand, it is been possible to pay higher wages to white persons the common doing in common with work. If, however, the cheatest labor of the Comese is driven out, the wages paid to white persons must be generally reduced or so does not be product will bear only a certain definite expenditure for labor. These things are regulated by the necessary law of business. Engloquent of thinese in the organic of accountry are Choses is driven out, the wages paid to white persons must be generally reduced or society especially will bear only a certain density for the persons must be generally reduced or society expenditure for latter. These things are regulated by the nedecsary law of business finghourest of thinese in the oregion of factory enabled the proprietors to pay more for the white about they employed. Employment of thinese to assort one and lead the cars at the longest to assort one and lead the cars at the longest to assort one and lead the proprietors to pay the white movers higher wages. When the law is the law must be described the proprietors to pay the white movers higher wages. When the law is the law is the law must be solved in their endorsement, the law masting for solve is solve to reduce the law master to the law master than they have ever been here for the work. Chinese latter can be longer be had on the Pacific skips wares for white labor will go lower than they have seen been here, for the work must be done for low wages, or remain and one. than they have ever been here, for the work must be done for low wages, or remain and one. The eastern states are no longer distant, and it is leastern competition, not timeses, that is bearing down the process of all products here, and necessarily the wages that produce them.

It was an outrage that "Nat" Baket and "Al"

While had to tramp all day under charge of an officer all over town in securing it bouls.

It was an outrage that "Nat" Baket as I "AL" White had to tramp all day under charge of an officer all over town in search of ball bonds. Why did not "Hon." John Myere of Clackamas and "Col." Hamilton of the bogus paper of Portland fly to their resist? The two men had but made an adort to carry out the purposes which these distinguished individuals had rec-gamented. To leave them in the lurch was LEGAL ASPECTS OF THE REGISTED sheltered and protected is a hoble one, but necessity from it out of practice in so many thousands of instances, that to decree ruthicesis There is grave doubt of the constitutionality

of the registry law enacted last year, and in order that its status may be determined judicially Mr. Eugene I. White if this city has brought a field. The "agination" at Paget Sound is producing a natural effects prove the industrial producing and producing and producing and producing the setting up objections to it and praying that it be declared invalid. Furget Stearns of the state district court, without con sidering the case, has rendered a 100 form, the decision maintaining the law, and now, upon anyear, the question goes directly before the supreme court, whose decision will be final. It is important that the status of the law should be

fixed before the time set for registration, and the supreme court has consen ed () an early hearing of the case. The objections set up against the law are, hirs'; that it imposes a condition upon the exercise of Euffrage in violation of the state constitution, which provides the every male citizen of the age of twenty-one and upwards who shall have resided in the esste during the six months preceding elections shall have the right to rose and second, that in certain cases it may operate as a prelific tark to suffrage by persons possess-ing the constitutional qualifications of reters. The first objection is not regarded as dangerous versally that the reunirement of registration is calculates to facilitate and secure the constitu

tional tight of equirage and no to impair or im-peds that right. It has then decided in many cases that in state like obrown where the con-stitution is silent on the subject of registration, legislatures, under their general powers, have the authority to easet that all electors must registe: before being permitted o vote. Such an act to be valid, however, must be reasonable and inpartial and in the interest of constitutional suffrage rather then a restraint upon it. The second objection, namely, that our registry aw is likely to operate as a par to suffrage

in certain cases, is a more serious matter the terms of this law, if the specified days are allowed for registration, and no person whose mame is not put on the rolls during these days There is un provision whatever for ater registration, no means by which a citizen, however well-known or vouched for, can get his vote in. Between the ast day for regis-tration and the day of election there is a period of five weeks. In December last the supremacourt of Obio rendered a decision in a case simi lar to it is, declaring that a lay in which there is no regulation whereby those constitutionally qualified may, upon proof of their qualifications and giving a reasonable exques for not registering in time, be allowed to vote, and where no other means are provided whereby persons other means are provided whereby persons necessarily absent at the time injud for registra-tion may have their names registered, is unrea-sonable, and has a direct that design to impair the right of suffrage, and may disrranchias without their fault a large body of voters necessarily atsent from the place of registry during the allotted time for registration, and is therefore unconstitutional and void. There are other dec constitutional and void. There are other decisions is harmony with this view, of the case. But in Kansas the supreme court sustained a similar law, on the theory quoted above, that the registration, even if it into ves hardstip, is an aid to constitutional suffrage and not a restraint upon it. It was argued that registration is one of the modes in which rurie in elections is one of the modes in which furth in sections may be lattained, and every housest and qualified voter has an interest in securing the integrity of the ballot, and excluding the ballots of the discharged and unqualified. Every bonest voter is as much injured by the recept on of a fraudolentivous as by the exclusion of his own, and it makes but little difference to them whether his while is wrough; excluded or on opiciety neutralized by the ballot of a p root tro, malified, excluded the ballot of a p root tro, malified, excluded the malified or the first product of the kales law stants. We have a second or the first product of the first p While there are precedentified both views of the question, the prependerance of judgment is

against a law in the form of ours. It is unfortunate that our lawldoes und roustain saute promision by which citizens who are able to iprove their qualifications as electors, may not have the privilege of sufficace, even without registration. In other states the laws are fetter adjusted to the convenience of proters. If the supreme court should hold the law to be valid next stands, it ought to be amended at the next legislative session to meet the objections against it urged to those who fird its duties ink-some. It cannot be dealed that a very large proportion of the voters regard the registry law as a nuisance which they would gladly be tid of Its confinements are a real hardship to the pa-pie in the country and a hardship which they accept with peor grace. Registration is a posi-tive necessity in Fortland and Astoria, where there is always a large undo-resident rabble on sale;to the highest bidder, and the people of the country certainly ought to prefer undergoing some trouble rather than have their votes neutralized by the votes of victors unercentaries.

A FROFOSED LABOR CONVENTION.

An in ernational movement in the interests of working men, looking 35 a corression of delegates in September from the United States and all Buncpean countries, a being agitated by a diabatic members of the French chamber of deputies. There are no bew features in the nevernient, labor agriculting is a temperance work having long ago exhquested it a entire field of originality in its special line of bifort. Thus when a temperative leading is authorized the public instinctively feels that statistics relative to the have made in human the And laptoness to the litting habit, the manner in which the hosts of rum are recruited, the cricke and come and who that is born in the nation's dram-shops. breiness of causing tish cannot go on, the work of causing the hands of the confirmy has stopped the hands of the confirm has been depth in red in the hands as a first the cannot have been depth in red in the hands as a first the confirm hand hard. besirt themselves that the work of cleaning and sprinkling shall be join by continued under some single management as a public necessity. The city now owns a complete plant for executing toth branches of work is the seasons servar ely require. The nature of the business is such that nearly all of the entire plant is employed in the many months of the plant for cleaning, and the same force of horses for sprinkling in sommer. Thus, in every thought of economical management, the winter and summer alternate while should be conducted by a single source of superacion; otherwise, if the city plant is sofely confined to cleaning, as now provided by ordinance, the city be rese will be expensively life for about of the rummer, and the same effect in which the conducted by plant is now well provided by ordinance, the city he rese will be expensively life for about of the rummer, and the same effect in which has out the plant is now well provided for both cheese of work and should, execute both.

In order to avoid the present difficulty, it is urgent that some practical mode to suggested take point size the top of the search searched. Thereby exposing a sharp contrast to the expensive management of the past two peres. As the city is not prepared to pay for other than eleming, the only remedy seems to be to contrast to the expensive management of the past two peres. As the city is not prepared to pay for other than eleming, the only remedy seems to be to contrast the city plant in a whote, with agreement to employ the plant for spithling so far as the people may privately and whose, with agreement to employ the plant for spithling so far as the people may privately and the trained and intelligent basis, the city application to perchase or lease the city plant in a whole, with agreement to employ the plant for spithling to far as the people may privately and the city to res me control of both classely of work. I may then the Ata meeting of the Hills for Assembly of Labor the weed the following resolution was unanamously adopted "Recolved, that this assembly will be always look to the laws of our country, and every ready to assist in putting down disorderive conduct, or any attempt to violate the laws of this state or the latted states, whenever occurs or requires, from whatever sources it may come "commencing or this the Internation adds "Some of the late acts of the Anti-Coolie association at Origon (tay and elsewhere have made it necessary for the Enights of Labor to make public a statement denoming such unit with proceedings. Our people are on the side of law and order, and while some of them have teen led to connect the maketes with the Anti-

GRILLY OF ASSAUGI ON V.—In the police court tester day Michael Twee rey bad a total for as secting Priscilla Gunior early last Sunday morning with intent to roth her, and also with assault and batters, who do consisted in hischolong her. Her testimony was that he entered her house at 10 clock in the morning with two offer men, and that he held her down while the offers russacked the rinks, but were circulated and the peting anything. Sweeney decised this round little. His story, was that he left thard is sale to, at I curted it and 0, with the tour in the man, and we walking up the side is the sealched by fire him non-rou. He flowed, the fell, and let ried to get his mone bock by chooling fer. I also be desimised the option of near to not. After informing him of the try of associating with a low set he all picked him guilts of latets, and sent him up fur five days. saulting Priscilla Gunion early last Sunday

charles Traper, was trued and convicted in the point court jesterday of a lowing a gill by years of age to hang are not the premises. I raper's detense was that the girl worked as a sewant for his with an it had told bins she was 19 rears old. He also attended to make out that she ouly loafed in the dance hall in the rem of his place was under the control of one John Burg. Judge Dement, after hinting gints strongly that Traper's attempt to sheald himself wouldn't go down, fined him. So He stated further that he would deal severely with all cases of minors frequenting saloons, and that it was time inquot sollers found out that there was a city ordinance punishing this offense, and that in future it would be strictly enforced. Traper's attorney gave notice of his intention to ippeal. tharles Traper, was trud and convicted in the

Succession Surger -It must be a matter of surprise to the many brends of Mrs. Thomas Guinean to hear of her rapid recovery. She has been a sufferer for over ten pears, and while in califorms had consulted the leading physicians, who were unablested determine the cause intitudent two years ago, when he Henry E. Jones at once pronounced the case as an ovariant more, necessitating a surgicul operation. The so shocked and innerved her, tended to seriously affect her gengra health but at 1 st she

circuit court yesterday, in answer was filed in case of George (Baker, of Sa: I rancise), vs case of (corge 6 Baker, of Sa: I raccise), values of Cooper and trus W. Cooper Savetil days age Baker brought sait against cue Cooper and Jumes O Cooper, who went suitely for the toper, to recover \$500, because this Cooper threw up a contract as agent to sell a to kealed "Bright and Halpy Homes." In their answers the Coopersallage that they in least of the work was to be sold by subscription only, and exclusively by this Cooper, and that Baker put a large number of the books on sale in the took stores here. Cooper (altims to performe thrity three days' work, and that there is \$11 ty three days work, and that there is a t due him, for which he prays judgment a ic coses. FCHOOL BOARD MEETING

Architect's Report as to the Safety of Falling and Userch School Bulldings-High School De-bating Scalety to be Reorgan 294

regular meeting of the school board was A depth tenening All prisent tut Unrecht Dodd President versieng presiding Addie Jennings and Mats Markay were ex-cused for non-attendance at the last teachers in

Laura Resental filed application for a position in the department as a teacher.

Mr. Thompson asked larve of absence for a month, on account of the going east grants.

A consmittee consisting of two scholars of the High school asked permission to reorganize the desating society of the High school, and for the use of Pr f Warren's room to meet in, and to be allowed to admit outsilers as members, of goodpoord character. The boys had a meeting yelluday, and think it best to exclude the girls at drive a society for young men, and to the the girls degrance and occasionally hold on meetings. After some debate the request was granted for condition that they first sub intil error estimation and by laws to Pr f. Warren to Miller and the Market and Market of the substitution and by laws to Pr f. Warren

trance on country and the day mereor it error estration and ty laws to Prof. Warren Commitmenton.

From Justus Krumbein. To the Brard of School Directors—In response to your request to examine the couch and I ading school houses and give my opinion regarding the safely of the second and attachors. I herewith subunities following. I have given both buses a liese inspection, and advise the bound to strengthen the second floor and ceiting, by running a two-inch is or coff in each course of the light wall in the second floor to within six feet under the roof, where these rods are type feet up tight to a run of sufficients elected security to the light well shaft and a brace up her indee this run at start in the nain revise of hermore, which have Second become for the light well shaft in the second floor to the column as here it essent by the stringer which have Second become by the stringer which have Second become the Up to mode to the column could be organized by the analyse second the location of the form and thak it is not perfectly and the first that the late ordains as per second that we not perfectly and the first the late of the form and make it on perfectly and the second that we take the late of the form and make it on perfectly and the second that the name of the form and make it on perfectly and the second the second that the late of the form and make it on perfectly and the second that the form and the second that the second the s
